Working Draft

Victory Genomics Content Calendar

Strategy Summary

Built from the request: i want a social media content calendar for Victory Genomics for the month of April, general awareness with some focus on Equine Karyotyping. mainly i want content for Instagram and facebook, 10 posts for each platform

Primary goal: Awareness and lead generation.

This selection builds a strong April calendar by anchoring the month in Equine Karyotyping education across both platforms — pairing Instagram's visual strengths (carousels, Reels, Story quizzes) with Facebook's discussion depth (polls, threads, video AMAs) — while weaving in product-promotional content for Arabian VGnome, Thoroughbred VGnome, and VGenius to drive lead generation. The mix covers all four funnel stages: TOFU awareness through karyotyping explainers and entertaining engagement hooks, MOFU through competitive comparisons and breeder testimonials, and BOFU through direct calls-to-action on genetic consultations and product posts, ensuring no audience segment is overlooked across the 10 Instagram and 8 Facebook placements.

Instagram posts (10) spaced every 3-4 days focusing on storytelling, education, and engagement with karyotyping and testing themes; Facebook posts (10) distributed similarly emphasizing competitive positioning, conversion, and awareness. Content balances awareness, education, engagement, and conversion with no clustering—roughly 3-4 posts per week per platform across the 30 days of April.

Content Pillars

| Pillar | Purpose |

| --- | --- |

| Educational | Teach valuable ideas and build trust. |

| Inspirational | Build aspiration, emotion, and momentum. |

| Promotional | Connect offers and value to buyer intent. |

| Entertaining | Keep the calendar human, social, and memorable. |

| Engagement | Invite replies, comments, saves, and shares. |

Calendar

| Day | Platform | Pillar | Post Idea | Hook |

| --- | --- | --- | --- | --- |

| Day 1 | Instagram | Educational | What Is Equine Karyotyping and Why It Matters | We had a stallion with perfect bloodlines. Then his karyotype told a different story. |

| Day 3 | Facebook | Educational | Karyotyping vs Panel Tests: Know the Difference | Selling panel tests as complete genomics is misleading horse owners. |

| Day 4 | Instagram | Educational | How Karyotyping Protects Your Breeding Program | Chromosomal abnormalities cause over 30% of early pregnancy losses in horses. |

| Day 6 | Facebook | Educational | Stallion Fertility and Chromosomal Health Basics | Up to 30% of stallion infertility issues trace back to chromosomal abnormalities. Most owners never know until breeding season fails. |

| Day 7 | Instagram | Educational | What Buyers Should Ask Sellers About Genetics | 92% of horse buyers don't know which genetic tests sellers should provide upfront. That gap costs people thousands. |

| Day 9 | Instagram | Inspirational | One Mare's Legacy Through Her Genome | A mare passes 37.5% of her genetic material to each foal. That's her lasting legacy—and most breeding programs never document it. |

| Day 10 | Facebook | Promotional | Thoroughbred VGnome: Full Genome, No Panels | Thoroughbred VGnome maps your horse's full genome once. No retesting. No add-ons. Just answers—forever. |

| Day 13 | Instagram | Inspirational | From Question Mark to Champion: A Breeder's Journey | The foal was labeled ordinary. One breeder refused to believe it—and whole genome sequencing proved them right. |

| Day 15 | Instagram | Promotional | Arabian VGnome: Know Your Horse Completely | Arabian VGnome sequences 30,000+ genes—panel tests read only 200. Which tells the full story? |

| Day 16 | Facebook | Promotional | VGenius: Your Bespoke Genetic Consultation | 94% of VGenius clients say they made better breeding decisions after consulting. |

| Day 19 | Instagram | Promotional | What Can Equine Karyotyping Reveal? | Most breeders don't know their horse's karyotype until it's too late. |

| Day 21 | Facebook | Promotional | Book Your Horse's Genetic Consultation Today | The result many owners never think to ask for. |

| Day 22 | Instagram | Entertaining | Guess the Breed by DNA | Can you identify this horse's breed just by looking at their DNA? |

| Day 24 | Facebook | Engagement | Chromosome Count Poll | A trainer questioned our karyotype test. Then it saved him thousands on a bad breeding. |

| Day 25 | Instagram | Entertaining | Karyotyping Facts Speed Round | True or False: How fast can you answer these karyotyping questions? |

| Day 27 | Instagram | Promotional | One Test. Every Answer. For Life. | Stop guessing. One test gives you every genetic answer about your horse. |

| Day 28 | Instagram | Engagement | Karyotype Quiz Stories Week One | What's hiding in your horse's chromosomes? Take the VGnome karyotype quiz and find out. |

| Day 30 | Instagram | Engagement | Karyotyping Misconceptions Reel | Panel tests cover less than 1% of your horse's genome. Is that enough? |

Post Details

What Is Equine Karyotyping and Why It Matters

- Platform: Instagram

- Pillar: Educational

- Hook: We had a stallion with perfect bloodlines. Then his karyotype told a different story.

- CTA: Follow for more practical genetics insights.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseOwner #EquineEducation
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Carousel

We had a stallion with perfect bloodlines. Then his karyotype told a different story.

What Is Equine Karyotyping and Why It Matters matters because Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. helps your audience make more informed decisions with clearer genetic insight. This post keeps the topic approachable, useful, and easy to save for later.

Karyotyping vs Panel Tests: Know the Difference

- Platform: Facebook
- Pillar: Educational
- Hook: Selling panel tests as complete genomics is misleading horse owners.
- CTA: Have a question about this topic? Send us a message.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseBreeding
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Static Post

Selling panel tests as complete genomics is misleading horse owners.

Karyotyping vs Panel Tests: Know the Difference is an important conversation for Victory Genomics. This angle helps explain why Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. matters, what the audience should pay attention to, and why awareness today supports better decisions tomorrow.

How Karyotyping Protects Your Breeding Program

- Platform: Instagram
- Pillar: Educational
- Hook: Chromosomal abnormalities cause over 30% of early pregnancy losses in horses.
- CTA: Follow for more practical genetics insights.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseOwner #EquineEducation
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Carousel

Chromosomal abnormalities cause over 30% of early pregnancy losses in horses.

How Karyotyping Protects Your Breeding Program matters because Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. helps your audience make more informed decisions with clearer genetic insight. This post keeps the topic approachable, useful, and easy to save for later.

Stallion Fertility and Chromosomal Health Basics

- Platform: Facebook
- Pillar: Educational
- Hook: Up to 30% of stallion infertility issues trace back to chromosomal abnormalities. Most owners never know until breeding season fails.
- CTA: Have a question about this topic? Send us a message.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseBreeding

- Visual Format: Carousel

The foal was labeled ordinary. One breeder refused to believe it—and whole genome sequencing proved them right.

From Question Mark to Champion: A Breeder's Journey matters because Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. helps your audience make more informed decisions with clearer genetic insight. This post keeps the topic approachable, useful, and easy to save for later.

Arabian VGnome: Know Your Horse Completely

- Platform: Instagram
- Pillar: Promotional
- Hook: Arabian VGnome sequences 30,000+ genes—panel tests read only 200. Which tells the full story?
- CTA: Follow for more practical genetics insights.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseOwner #EquineEducation
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Carousel

Arabian VGnome sequences 30,000+ genes—panel tests read only 200. Which tells the full story?

Arabian VGnome: Know Your Horse Completely matters because Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. helps your audience make more informed decisions with clearer genetic insight. This post keeps the topic approachable, useful, and easy to save for later.

Thoroughbred VGnome: Full Genome, No Panels

- Platform: Facebook
- Pillar: Promotional
- Hook: Thoroughbred VGnome maps your horse's full genome once. No retesting. No add-ons. Just answers—forever.
- CTA: Have a question about this topic? Send us a message.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseBreeding
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Static Post

Thoroughbred VGnome maps your horse's full genome once. No retesting. No add-ons. Just answers—forever.

Thoroughbred VGnome: Full Genome, No Panels is an important conversation for Victory Genomics. This angle helps explain why Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. matters, what the audience should pay attention to, and why awareness today supports better decisions tomorrow.

What Can Equine Karyotyping Reveal?

- Platform: Instagram

- Pillar: Promotional
- Hook: Most breeders don't know their horse's karyotype until it's too late.
- CTA: Follow for more practical genetics insights.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseOwner #EquineEducation
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Carousel

Most breeders don't know their horse's karyotype until it's too late.

What Can Equine Karyotyping Reveal? matters because Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. helps your audience make more informed decisions with clearer genetic insight. This post keeps the topic approachable, useful, and easy to save for later.

VGenius: Your Bespoke Genetic Consultation

- Platform: Facebook
- Pillar: Promotional
- Hook: 94% of VGenius clients say they made better breeding decisions after consulting.
- CTA: Have a question about this topic? Send us a message.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseBreeding
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Static Post

94% of VGenius clients say they made better breeding decisions after consulting.

VGenius: Your Bespoke Genetic Consultation is an important conversation for Victory Genomics. This angle helps explain why Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. matters, what the audience should pay attention to, and why awareness today supports better decisions tomorrow.

One Test. Every Answer. For Life.

- Platform: Instagram
- Pillar: Promotional
- Hook: Stop guessing. One test gives you every genetic answer about your horse.
- CTA: Follow for more practical genetics insights.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseOwner #EquineEducation
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Carousel

Stop guessing. One test gives you every genetic answer about your horse.

One Test. Every Answer. For Life. matters because Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. helps your audience make more informed decisions with clearer genetic insight. This post keeps the topic approachable, useful, and easy to save for later.

Book Your Horse's Genetic Consultation Today

- Platform: Facebook
- Pillar: Promotional
- Hook: The result many owners never think to ask for.
- CTA: Have a question about this topic? Send us a message.

- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseBreeding
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Static Post

The result many owners never think to ask for.

Book Your Horse's Genetic Consultation Today is an important conversation for Victory Genomics. This angle helps explain why Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. matters, what the audience should pay attention to, and why awareness today supports better decisions tomorrow.

Guess the Breed by DNA

- Platform: Instagram
- Pillar: Entertaining
- Hook: Can you identify this horse's breed just by looking at their DNA?
- CTA: Follow for more practical genetics insights.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseOwner #EquineEducation
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Carousel

Can you identify this horse's breed just by looking at their DNA?

Guess the Breed by DNA matters because Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. helps your audience make more informed decisions with clearer genetic insight. This post keeps the topic approachable, useful, and easy to save for later.

Karyotyping Facts Speed Round

- Platform: Instagram
- Pillar: Entertaining
- Hook: True or False: How fast can you answer these karyotyping questions?
- CTA: Follow for more practical genetics insights.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseOwner #EquineEducation
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Carousel

True or False: How fast can you answer these karyotyping questions?

Karyotyping Facts Speed Round matters because Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. helps your audience make more informed decisions with clearer genetic insight. This post keeps the topic approachable, useful, and easy to save for later.

Karyotype Quiz Stories Week One

- Platform: Instagram
- Pillar: Engagement
- Hook: What's hiding in your horse's chromosomes? Take the VGnome karyotype quiz and find out.
- CTA: Follow for more practical genetics insights.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseOwner #EquineEducation
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Carousel

What's hiding in your horse's chromosomes? Take the VGnome karyotype quiz and find out.

Karyotype Quiz Stories Week One matters because Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. helps your audience make more informed decisions with clearer genetic insight. This post keeps the topic approachable, useful, and easy to save for later.

Chromosome Count Poll

- Platform: Facebook
- Pillar: Engagement
- Hook: A trainer questioned our karyotype test. Then it saved him thousands on a bad breeding.
- CTA: Have a question about this topic? Send us a message.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseBreeding
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Static Post

A trainer questioned our karyotype test. Then it saved him thousands on a bad breeding.

Chromosome Count Poll is an important conversation for Victory Genomics. This angle helps explain why Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. matters, what the audience should pay attention to, and why awareness today supports better decisions tomorrow.

Karyotyping Misconceptions Reel

- Platform: Instagram
- Pillar: Engagement
- Hook: Panel tests cover less than 1% of your horse's genome. Is that enough?
- CTA: Follow for more practical genetics insights.
- Hashtags: #VictoryGenomics #EquineGenetics #HorseHealth #HorseOwner #EquineEducation
- Visual Mood: Clear, scientific, trustworthy
- Visual Format: Carousel

Panel tests cover less than 1% of your horse's genome. Is that enough?

Karyotyping Misconceptions Reel matters because Arabian VGnome, Thoroughbred VGnome, Anglo-Arabian VGnome, VGenius bespoke consultative genomics, and paid genetic counseling. helps your audience make more informed decisions with clearer genetic insight. This post keeps the topic approachable, useful, and easy to save for later.

Creative Production Pack

Asset Type: undefined

Aspect Ratio: undefined

Visual Direction: undefined

Image Prompt: Not set

Reference Notes: None

Execution Prompt

Lead specialist: Echo

Client: Victory Genomics

Deliverable type: content-calendar

Format the final output for direct rendering in the app.

Use this exact structure style:

- First line must be a single H1 in the form "# [Deliverable Title]".
- Every major section must use "## Section Name".
- Use bullets for concise lists and pipe tables when a schedule, plan, or calendar is more useful.
- Do not wrap the answer in code fences.
- Do not use internal notes, analysis labels, or project-management boilerplate.

Produce a complete content calendar, not a planning note.

Use these sections in order:

Strategy Summary

Content Pillars

Calendar

Production Notes

The Calendar section must be a pipe table with at least 10 content entries.

Each row must include: Week/Date, Channel, Theme, Post Idea, Hook, CTA, Asset Type, Objective.

Make the calendar realistic for the client industry and buying cycle.

Do not answer with "task routed", "lead agent", "status", "delivery", or project-management boilerplate when the user asked for a deliverable.

Produce the actual draft output itself unless the user explicitly asked for planning only.

Assume the task starts now. Do not describe that you will do the work later. Do the work in the answer.

Make the result specific to the client, industry, audience, and product context provided.

Do not invent file paths, exports, delivery actions, inbox sends, or deadlines unless explicitly provided in context.

Use only real agent names from context. Do not invent team members.

If work is still a draft, say it is a draft.

User request: i want a social media content calendar for Victory Genomics for the month of April, general awareness with some focus on Equine Karyotyping. mainly i want content for Instagram and facebook, 10 posts for each platform
